

SS Soap Dispenser Maintenance

1. Filling the Dispenser

- ❖ This dispenser is only designed for PH neutral liquid soap.
- ❖ Avoid filling very thick liquids, abrasive cleaner or combination cleaner/polish be used on this product.
- ❖ When filling with liquid soap, be sure to wipe off liquid spilled on the container. Never overfill. Otherwise it will accelerate the rust.

2. Maintaining the Dispenser

To maintain the pleasing appearance of your stainless steel product, you must perform periodic and frequent cleaning.

- ❖ ONLY clean inside the dispenser with warm water, NEVER use solvents or aggressive household cleaners like bleach, acids or ammonia-based bathroom cleaner.
- ❖ To clean the outside of the dispenser with soft cloth, use water or warm soapy water or approved stainless steel cleaner. Wipe the dispenser after cleaning.
- ❖ Should brown deposits appear around the lid or pump, remove with a brush or pan cleaning pad and soapy water. Hard deposits can be scratched off with your fingernail or a blunt knife.
- ❖ If the dispenser is not used for a long period of time and becomes clogged, pour ONLY warm water into the dispenser and gently pump it to clear the blockage. NEVER try inserting a sharp object e.g. pin into the soap nozzle, which could irreparably damage the pump and void the warranty.
